## PrimePortal

FileShare is a way to share large files for which version control is not an issue. For example: deliverables and binary installation files.

## FILESHARE MANAGEMENT USING FILEZILLA

FileZilla client is a free open source ftp client that is widely used, we recommend that you use FileZilla.

You can download it from https://filezilla-project.org/

Install and start FileZilla, client version.

Open Site Manager (Ctrl+S) of top result under the File menu.

In the advanced tab you may configure directory settings.

The directory will be the name of your primeportal.

If your portal is <u>https://demo.primeportal.com</u> the directory will be \demo
